Factors which are material for the purpose of assessing the market risks associated with Bond

The Bonds may not be a suitable investment for all investors. Each potential investor in the Bonds must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should:

- (i) have sufficient knowledge and experience to make a meaningful evaluation of the Bonds, the merits and risks of investing in the Bonds and the information contained or incorporated by reference in this Securities Note and/or Registration Document or any applicable supplement;
- (ii) have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Bonds and the impact the Bonds will have on its overall investment portfolio;
- (iii) have sufficient financial resources and liquidity to bear all of the risks of an investment in the Bonds, including where the currency for principal or interest payments is different from the potential investor's currency;
- (iv) understand thoroughly the terms of the Bonds and be familiar with the behaviour of the financial markets; and
- (v) be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.

6. Appendix:	17

1. Risk factors

All investments in interest bearing securities have risk associated with such investment. The risk is related to the general volatility in the market for such securities, varying liquidity in a single bond issue as well as company specific risk factors. The Bonds may not be a suitable investment for all investors. Each potential investor in the Bonds must determine the suitability of that investment in light of its own circumstances. In particular, each potential investor should have sufficient knowledge and experience to make a meaningful evaluation of the Bonds, the merits and risks of investing in the Bonds. An investment in the Bonds entails significant risks and is suitable only for investors who understand the risk factors associated with this type of investment and who can afford a loss of all or part of its investment. In case of a bankruptcy, the bondholder risk losing its entire investment, and settlement of any potential dividend will not take place until the bankruptcy proceedings have been completed.

Credit risk is the risk that the Issuer fails to make the required payments under the Bonds (either principal or interest). The Issuer's ability to make scheduled payments on or to refinance its obligations under, the Bonds will depend upon the Issuer's financial and operating performance, which, in turn, will be subject to prevailing economic and competitive conditions and to financial and business factors, many of which may be beyond the Issuer's control.

Liquidity risk is the risk that a party interested in trading the Bonds cannot do so because no one in the market wants to trade the Bonds. Illiquidity may result in the Bondholder incurring a loss.

Interest rate risk is the risk borne by the Bonds due to variability of the NIBOR interest rate. The coupon payments, which depend on the NIBOR interest rate and the Margin, will vary in accordance with the variability of the NIBOR interest rate. The interest rate risk related to the Bonds will be limited, since the coupon rate will be adjusted quarterly according to the change in the reference interest rate (NIBOR 3 months) over the 5-year tenor. The primary price risk for a floating rate bond issue will be related to the market view of the correct trading level for the credit spread related to the bond issue at a certain time during the tenor, compared with the credit margin the bond issue is carrying. A possible increase in the credit spread trading level relative to the coupon defined credit margin may relate to general changes in the market conditions and/or Issuer specific circumstances. However, under normal market circumstances the anticipated tradable credit spread will fall as the duration of the bond issue becomes shorter. In general, the price of bonds will fall when the credit spread in the market increases, and conversely the bond price will increase when the market spread decreases.

Settlement risk is the risk that the settlement of bonds in the Bond issue does not take place as agreed. The settlement risk consists of the failure to pay or the failure to deliver the Bonds.

Market risk is the risk that the value of the Bonds will decrease due to the change in value of the market risk factors. The price of a single bond issue will fluctuate in accordance with the interest rate and credit markets in general, the market view of the credit risk of that particular bond issue, and the liquidity of the bond issue in the market. In spite of an underlying positive development in the Issuer's business activities, the price of a Bond may fall independent of this fact. Bond issues with a relatively short tenor and a floating rate coupon rate do, however, in general carry a lower price risk compared to bond issues with a longer tenor and/or with a fixed coupon rate.

No market-maker agreement is entered into in relation to the Bonds, and the liquidity of bonds will at all times depend on the market participants view of the credit quality of the Issuer as well as established and available credit lines.

Status of the Bonds - The Bonds will constitute senior debt obligations of the Issuer. The Issuer's payment obligations under the Bond Terms shall rank ahead of all subordinated payment

obligations of the Issuer and the Bonds shall rank pari passu between themselves and will rank at least pari passu with all other obligations of the Issuer, save for obligations which are mandatorily preferred by law.

The payment obligations under the Bonds shall be secured by a first priority joint security interest (comprising of a property mortgage and security over any insurance claims related to that property) (the "Joint Security Interest"). The Joint Security Interest shall secure (i) the payment obligations under the Bonds and (ii) any additional loan obligations allowed to be secured by the Joint Security Interest under the Bond Terms and the Intercreditor Agreement, on a joint and pro rata basis among the bondholders and the creditors for such additional loans, and as further provided for in the Intercreditor Agreement.

If the Bonds are to be refinanced, the Issuer may also grant a cash for refinancing security, where an amount corresponding to the principal amount outstanding under the Bonds plus interest accruing up to the maturity date are to be paid to a pledged and blocked account and serving as the sole and exclusive security for the payment obligations under the Bonds.

Please refer to the Registration Document for a listing of company specific risk factors.

As the Bonds have a floating reference rate, it is the market's expectations of risk premium, i.e. margin that affects the price. No vote may be cast by any nominee if the Bondholder has presented relevant evidence to the Bond Trustee pursuant to Clause 7.3 (*Bondholders' rights*) stating that it is the owner of the Bonds voted for. If the Bondholder has voted directly for any of its nominee registered Bonds, the Bondholder's votes shall take precedence over votes submitted by the nominee for the same Bonds.
- (d) Any of the Issuer, the Bond Trustee and any Bondholder has the right to demand a vote by ballot. In case of parity of votes, the Chairperson will have the deciding vote.

A Summons for a repeated Bondholders' Meeting shall also contain the voting results obtained in the initial Bondholders' Meeting.

- (c) A repeated Bondholders' Meeting may only be convened once for each original Bondholders' Meeting. A repeated Bondholders' Meeting may be convened pursuant to the procedures of a Written Resolution in accordance with Clause 8.5 (*Written Resolutions*), even if the initial meeting was held pursuant to the procedures of a Bondholders' Meeting in accordance with Clause 8.2 (*Procedure for arranging a Bondholders' Meeting*) and vice versa.

8.5 Written Resolutions

- (a) Subject to these Bond Terms, anything which may be resolved by the Bondholders in a Bondholders' Meeting pursuant to Clause 8.1 (*Authority of the Bondholders' Meeting*) may also be resolved by way of a Written Resolution. A Written Resolution passed with the relevant majority is as valid as if it had been passed by the Bondholders in a Bondholders' Meeting, and any reference in any Finance Document to a Bondholders' Meeting shall be construed accordingly.
- (b) The person requesting a Bondholders' Meeting may instead request that the relevant matters are to be resolved by Written Resolution only, unless the Bond Trustee decides otherwise.

- (f) Only Bondholders of Voting Bonds registered with the CSD on the Relevant Record Date, or the beneficial owner thereof having presented relevant evidence to the Bond Trustee pursuant to Clause 7.3 (*Bondholders' rights*), will be counted in the Written Resolution.

- (g) A Written Resolution is passed when the requisite majority set out in paragraph (e) or paragraph (f) of Clause 8.1 (*Authority of Bondholders' Meeting*) has been obtained, based on a quorum of the total number of Voting Bonds, even if the Voting Period has not yet expired. A Written Resolution will also be passed if the sufficient numbers of negative votes are received prior to the expiry of the Voting Period.
- (h) The effective date of a Written Resolution passed prior to the expiry of the Voting Period is the date when the resolution is approved by the last Bondholder that results in the necessary voting majority being obtained.
- (i) If no resolution is passed prior to the expiry of the Voting Period, the number of votes shall be calculated at the close of business on the last day of the Voting Period, and a decision will be made based on the quorum and majority requirements set out in paragraphs (d) to (f) of Clause 8.1 (*Authority of Bondholders' Meeting*).

Forutsetninger

Kontantstrømmene er basert på:

- Antakelser om at alle leiekontrakter fornyes til markedsleienivå
- Leieinntekter betales forskuddsvis hvert kvartal
- Stabile eierkostnader - dvs en snittbetraktning på vedlikeholdskostnader
- Rehabiliteringskostnader som inntreffer ved fornyelse av leiekontrakter

Metodikk:

- Årlige leieinntekter justeres med en reduksjonsfaktor for kvartalsvise innbetalinger
- Eierkostnader og rehabiliteringskostnader justeres på liknende måte for å reflektere en jevn kostandspredning ut over året
